Cast 8 Times

Mould S3  
Cast 3 Times

Mould S4  
Cast 2 Times

Mould R1  
Cast 2 Times

Mould R3  
Cast 4 Times

## Right Hand Wall

Take these casts and make the Right hand Wall

## Left Hand Wall

Take these casts and make the Left hand Wall

## The Front Wall

Take these casts and make the Front Wall.

Remember to glue some broken casts on the inside across the joints, this will add strength to the finished model, but be carefull not to put them to close to the window openings if you intend to add acetate for windows.

### Making the Rear Wall

Take these casts and make the rear wall.

### The Out Houses

For these you will need two wooden style door casts and a half wall , for each outhouse.

Glue the two doors together.

You will need two small fillets to fit under the end of the outhouse roofs, as per the drawing.

### Assembling the model.

When all the sections are dry, Glue the front wall to the right and left hand walls. Ensuring they are square. Then add the rear wall. Next the outhouses as per the pictures.

**Roofs**

Take these casts and make the roof section for the main house.  
Do this twice .

When dry glue to the Building.

**Outhouse roofs.**

Make two.

When dry glue to the outhouses.

**Making the Back yard walls.**

Take four door casts S2-146, Carefully cut as shown, then glue back to back to make two doors.

Use four wall casts S1-37, glue back to back to form a wall.

When dry cut the fingers from one end. Now glue one of the doors to the wall

Carefully measure between the two rear walls of the outhouses.

Take this measurement to the back yard wall.

Place the other door on the wall and carefully cut to this line.

Then glue the other door on the end

This should fit snugly between the outhouses as shown in the above picture.  
When dry glue in place between the outhouses.

Now take two casts S1-37, Glue back to back. When dry cut the fingers from one end, then check the fit from the back wall of the house to the rear wall, it should need the other fingers cutting of to fit.

Glue in place between house and wall as the picture on the right.  
Top the walls with cast S3-125 the half round beam.

### **Chimneys pots and Ridging.**

Take four chimney casts R1-13 and glue back to back to make two chimneys. When dry glue in the centre of the roof ridge.

Now glue pieces of cast R1-22 along the ridge to finish the roof.

All that remains is to fill any holes and gaps and then paint in your preferred colour scheme. Also window decoration.
